

In response to Hurricane Florence, the Town of River Bend provided both vegetative and demolition debris removal service. That service was for a temporary time and ended on November 2, 2018. The Town will continue to provide regular leaf and limb removal service, in accordance with the regular schedule and current rules. That schedule and those rules are posted on our web page. The Town does not offer any other debris removal service. Any current construction debris or construction debris that is generated in the future is the responsibility of the homeowner to remove. Please do not place construction debris by the roadside for collection or storage.
