

Special Announcement Concerning Piedmont Natural Gas (PNG)

As you already know, PNG has begun a project to extend natural gas service to River Bend. Many of you lost your HVAC system and/or water heater as a result of Hurricane Florence. Before you make arrangements to replace your damaged HVAC/water heater with a non-natural gas unit, you may need to think about the future availability of natural gas. In order to help you with that decision, PNG will have a representative on site to share information and answer questions. The meeting will begin at 6:30 p.m. on Tuesday, October 9 on the basketball courts near the Red Caboose. Bring your own chair. We know many of you are dealing with a terrible situation and may not be thinking about heating your home this winter, but this event may provide a perfect opportunity for you to convert to natural gas if you desire to do so.
