# Town of River Bend

Mayor and Town Council Priorities for Fiscal Year 2025-26 (approved 1-16-25)

## Our Vision Statement

River Bend is a dynamic and uniquely located waterfront and golfing community well prepared to benefit from the area's historical and natural resources. By protecting its assets and actively fostering a diverse multi-aged population, the River Bend community will continue to be a safe, attractive place to live and will be competitively positioned to participate in the broader area's economic and population growth.

Maintain a commitment to the Council-Manager form of government, and to support an adequate and well-trained staff to serve the current and future needs of the community.

Continue to cooperate regionally and with other municipalities and, where appropriate, share ideas and resources.

Continue to work with advisory boards as a means to encourage citizen participation in Town government.

Continue to be good stewards of the natural environment through planned stormwater and floodplain management efforts.

Continue to employ sound fiscal management practices to ensure the long-term financial viability of the Town.

Continue to operate wastewater treatment facilities to maintain regulatory compliance and serve the current and future needs of the Town.

Continue to provide a safe, dynamic, and attractive community for people of all ages, and continue to address the changing demographic composition of the Town.

Maintain a visionary posture, acknowledging that change is inevitable.

Continue to conduct the business of the Town with complete transparency and integrity.

Continue to provide safe drinking water and quality treatment of wastewater through sound maintenance of the current systems and continued prudent fiscal management of the utilities.

# Enterprise Fund Debt

For every dollar proposed to be spent in the Enterprise Fund, about 17¢ goes toward retirement of bond debt for the purchase of the water and sewer systems. In addition to the bond debt, the water fund also has \$5,750 in debt service for the 0% loan associated with the water meter replacement project. This will be year 3 of 20 for that debt.

## Debt as a Percentage of Total Expense in FY 25-26

**Water = 19% (\$133,671)**

**Sewer = 15% (\$115,429)**

**TOTAL \$249,100**

**Both mature in 2027**

# Enterprise Fund Summary

**(after the same variables as discussed in the General Fund are applied)**

- Represents an overall 4.93% increase in spending over last year (+\$70,188)
- No fee or rate increase
- Maintains all current programs and services
- Funds all employee compensation costs as discussed in General Fund
- Provides funding for \$249,100 for debt service
- Includes \$30,961 for water tank maintenance contract
- Includes \$111,651 of appropriated fund balance in water (-28% vs. budgeted in FY25)
- Includes \$10,200 funding for equipment purchase
- Includes \$94,606 of appropriated fund balance in Sewer Fund (+62% vs. budgeted in FY25)
- Includes \$50,000 in CIP funding for water line extension and lift station upgrade

# Water – System “Snapshot”

Three groundwater wells with a combined capacity of 925,000 gallons per day.

Two elevated storage tanks with a combined capacity of 400,000 gallons.

In FY 2024 we treated 122,955,000 gallons of water (average of 335,937 gallons per day).

Water is transmitted to 1,489 current users (meters) through 19 miles of pipe ranging in size from 2 to 8 inches in diameter.

There are 109 hydrants located throughout the system in order to give the fire department ample access to water for their work.

# Sewer Operations

# Sewer – System “Snapshot”

Currently serving 977 users.

Transmitted via approximately 11 miles gravity and force main pipes.

Eight lift stations pressurize portions of the system so the waste is efficiently moved to our treatment facility on Gull Pointe Drive.

Treatment plant permitted capacity of 330,000 gallons per day and discharges treated effluent to the Trent River.

In FY 2024, we treated 37,370,000 gallons of wastewater (average of 102,096 gallons per day or 31% of capacity).

2024	4,783,250	3,055,000
2025 YTD	4,654,500	2,996,250

Usage has remained basically flat from 2016-2024. Water has remained between the 4,000,000 and 5,000,000 lines. Sewer has hovered around the 3,000,000 line. Thus far, in FY25 a slight decreasing trend in total usage continues.

“A century ago, the average American used only about 10 gallons of water a day to drink, cook, clean, and bathe. Today, Americans use 80-100 gallons per day per person on average.”

Source: U.S. Environmental Protection Agency  
U.S. Geological Survey

Last year I said- “Over these years, there has been very little change in our gallons sold and our rates. Those 2 factors drive our revenues. During that same time period, the costs of almost everything we use to operate these systems has increased. That is not a sustainable, long-range business model.” I can say that again this year.

# Annual Water & Wastewater – Per Customer

The average monthly water usage per customer in 2025 (YTD) is 3,126 gallons. and the average usage per sewer customer is 3,067 gallons. In 2024, those averages were 3,225 gallons and 3,133 gallons respectively, which means there is a combined 166 gallon per month decrease in the average usage between the years.

# Current Utility Rates

## Per original Schwartz Study

**Customer:** Under this structure the “customer” component of the charges reflect the indirect costs to each utility.

**Demand:** This represents 75% of the debt service and capital costs for each utility.

**Usage:** This component should be used to collect the remaining 25% of the debt service and capital costs and all direct operating costs.

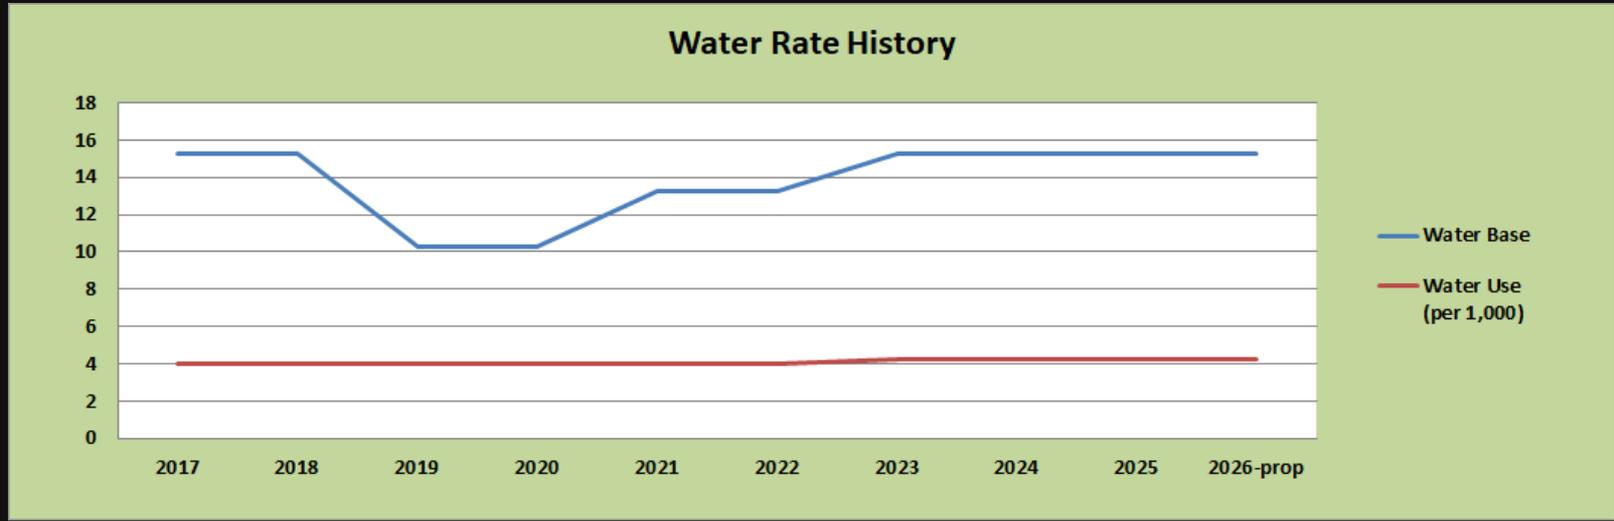

Current Rates	
<b>Water</b>	
Customer	\$4.80
Demand	\$10.44
Use(0-4,000 gallons)	\$4.22
4,001-20,000	\$4.50
20,001+	\$4.55

The “customer” and “demand” components are combined to determine the **Base Charge** we charge as a flat fee per month, per customer.

The “usage” component is charged at a rate per 1,000 gallons of metered use.

This is the calculus for the original design of the rate model. The actual %’s vary from year-to-year. The rate model does not recognize the current tiered water rate structure.

Green box indicates a year that there was a change in the rate. This graph is for 3,000 gallons usage, which is in the \$4.22 per/1000 gallon rate up to 4,000 gallons. In 2023, the town added rates of \$4.50 per/1000 gallon for 4,001-20,000 gallons and \$4.55 per/1000 gallon for 20,001+ gallons. We are charging the same base rate of \$15.24 that we were in 2015.

1996- Town Acquires System from Carolina Water. The rate that year for 3,000 gallons was \$17.80

## Customer Using 3,000 gallons Per Month

Water/Sewer Bill in 1996, which was the first year that River Bend owned the system, was.....

**\$40.10**

Today, the same bill, adding only for inflation (not for changes in operations due to regulations, system expansion, etc.) would be .....

**\$81.68**

Our customers, under proposed rates for FY25-26, will pay.....

**\$79.98**

Cumulative Inflation rate between July, 1996 and March, 2025= 103.69%. During that same time period, our rates have increased 99.45%. Given the numerous changes that our system has undergone since 1996, failing to even keep pace with inflation should not be a realistic expectation.

# Town of River Bend

## UTILITY RATE MODEL

The following charts are taken from the Town's Utility Rate Model and reflect a forecast based on the FY 25-26 proposed rates and budget amounts and future year budgets based on assumptions of revenues and expenditures in those future years, which are based on forecast changes in revenues and expenditures, which are based on variables as entered into the rate model.

During the budget workshop, the rate model will be live and interactive and we can make adjustments to it, to see what impact they will have on both funds.

Note- The rate model does not allow for multiple rate tiers, as were adopted for the water department on September 15, 2022. The figures represent the lowest water rate tier of \$4.22 per/1000 gallons for water. Therefore, the estimated revenues for water will most likely be higher than are budgeted. Also, as is the case with the General Fund, forecasted revenues are based on a 95% collection rate of budgeted revenue and expenditures are based on expending 75% of approved expenditures.
